AMENDMENTS TO THE SPECIFICATION

Please replace the paragraph beginning at page 1, line 6, with the following

rewritten paragraph:

The present invention relates to a grating as a wavelength

separation/selection element used in a spectroscope or a branching filter, and

negative and replica grating gratings manufactured by transfer from the grating and

methods of manufacturing these gratings.

Please replace the paragraph beginning at page 6, line 10, with the following

rewritten paragraph:

It is therefore an object of the invention to provide a grating having high

diffraction efficiency in a wide wavelength region, particularly in the resonance

domain and fitted for manufacturing replicas, and negative and replica gratings

gratins manufactured by transfer from the grating and methods of manufacturing

these gratings.
